SAVAS LABS

Brand Standards for the web, *in one place*

Color, type, shape and components. Generated from tokens.json, the same file Figma Variables sync with.

Color · Contrast · Typography · Shape & space · Components · Usage rules · Figma workflow

01

Color palette

Ink and white carry the page. Mint is the signature accent; coral is a spice used for emphasis. Each accent has a darker `-text` sibling for small text.

PAPER

#FFFFFF — **White** — Default page and slide background

#FEFBF4 — **Warm** — Website warm paper

#FBF3E4 — **Cream** — Callouts and quiet panels

INK & NEUTRALS

#1A1D2E — **Ink** — Primary text, dark surfaces

#3D4256 — **Graphite** — Body copy

#8C8E9E — **Mute** — Captions, eyebrows. Large text only on white

ACCENTS

#3EE0C5 — **Mint** — Signature accent. Fills, highlights, selection

#2BA48F — **Mint Ink** — Rules and large text only (2.68:1 on white)

#216963 — **Mint Text** — Mint dark enough for small text (AA)

#FF5A42 — **Coral** — Flourish, emphasis. Fills

#B5381A — **Coral Text** — Coral dark enough for small text (AA)

#FFB020 — **Marigold**

#C77DFF — **Lavender**

#0086F8 — **Ojo Blue** — Ojo product accent

LINES (INK AT OPACITY)

#1A1D2E — **Wash** — Ink @ 6%. (table headers, code chips)

#1A1D2E — **Subtle** — Ink @ 12%. (cheatsheet borders)

#1A1D2E — **Default** — Ink @ 14%

#1A1D2E — **Strong** — Ink @ 28%

02

Contrast

Computed from the token values (WCAG 2.x). Anything marked AA Large is for headings 24px+ or rules only.

PAIR	FOREGROUND / BACKGROUND	RATIO	GRADE
Aa Ink on White	#1A1D2E / #FFFFFF	16.68:1	AAA
Aa Graphite on White	#3D4256 / #FFFFFF	9.94:1	AAA
Aa Mute on White	#8C8E9E / #FFFFFF	3.24:1	AA Large
Aa Mint-text on White	#216963 / #FFFFFF	6.43:1	AA
Aa Coral-text on White	#B5301A / #FFFFFF	6.17:1	AA
Aa Mint-ink on White	#2BA48F / #FFFFFF	3.08:1	AA Large
Aa Ink on Mint	#1A1D2E / #3EE0C5	10.07:1	AAA
Aa Ink on Coral	#1A1D2E / #FF5A42	5.40:1	AA
Aa Ink on Marigold	#1A1D2E / #FFB020	9.12:1	AAA
Aa Ink on Lavender	#1A1D2E / #C77DFF	6.20:1	AA
Aa Mint on Ink	#3EE0C5 / #1A1D2E	10.07:1	AAA
Aa White on Ink	#FFFFFF / #1A1D2E	16.68:1	AAA

03

Typography

Manrope is the workhorse. PT Serif Italic is a deliberate flourish in coral, used for one word or phrase at a time. SF Mono is for code only.

display — Manrope · 36px · 800 · LH 1.2 · -0.02em
Digital that works

h2 — Manrope · 35px · 700 · LH 1.1 · -0.025em
Section heading

h3 — Manrope · 24px · 600 · LH 1.1 · -0.015em
Subsection heading

h4 — Manrope · 16px · 700 · LH 1.3 · -0.01em
Card title

body — Manrope · 17px · 400 · LH 1.55 · 0em
Body copy is set in Manrope, graphite on white, at a comfortable reading measure.

body-sm — Manrope · 14px · 500 · LH 1.6 · 0em
Secondary copy and table cells.

eyebrow — Manrope · 12.5px · 700 · LH 1.2 · 0.18em
SMALL CAPS EYEBROW

label — Manrope · 10.5px · 800 · LH 1.2 · 0.12em
GROUP LABEL

flourish — PT Serif · 33px · 400 · LH 1.3 · -0.02em
with a little serif italic

code — SF Mono · 13px · 400 · LH 1.5 · 0em
`git push origin main`

04

Radius, spacing & shadow

CORNER RADIUS

xs 4px · **sm** 8px · **md** 10px · **lg** 16px · **full** 9999px

SPACING SCALE

space-1 4px
space-2 8px
space-3 12px
space-4 16px
space-6 24px
space-8 32px
space-12 48px
space-16 64px

ELEVATION

shadow-1 — Resting cards

shadow-2 — Raised, hover

05

Components

The building blocks used in the cheatsheet, decks and reports. Each should exist as a Figma component with the same name.

Section card

GROUP LABEL

16px radius, 1.5px subtle border, wash header with a mint icon tile.

`git status` `claude`

Buttons

Primary · Dark · Outline

Pill shaped, Manrope 700. One primary per view.

Steps & flourish

1. Numbered step marker
2. Ship it *with confidence*

06

Usage rules

Do
Use ink text on mint, coral, marigold and lavender fills. Never white.

Do
Use `mint-text` / `coral-text` when an accent colors body-size text.

Do
Keep one serif-italic flourish per heading, in coral.

Don't
Set small text in `mint`, `mint-ink` or `mute` on white. They fail AA below large size.

Don't
Introduce new hexes. Add a token to tokens.json first.

Don't
Stack more than two accents in one component.

07

Figma ⇄ code workflow

Tokens and components sync both ways. Page layouts go design → code only.

1. **Edit in Figma** — Designers change Variables and components in the Savas Design System file.
2. **Export tokens** — Variables export to tokens.json (Tokens Studio or the Variables API) and land in a PR.
3. **Build** — `python3 build.py` regenerates tokens.css and this page. The site consumes tokens.css.
4. **Review & ship** — Preview deploy, designer sign-off, merge to production.
